

# DFRobot LCD keypad Shield

Und ein DFRobot LCD keypad Shield (Mai 2011, US \$17,75 aus Hongkong)

Arduino Pin	LCD-Pin
Analog 0	Taste (Up, Down, Left, Right, Select)
Digital 4	DB 4
Digital 5	DB 5
Digital 6	DB 6
Digital 7	DB 7
Digital 8	RS (Command or Data)
Digital 9	Enable
Digital 10	Hintergrundbeleuchtung

Neben einer normalen 2x16-LCD-Anzeige mit Hintergrundbeleuchtung gibt es 5 Tasten, die interessanterweise nicht einzeln auf Digitalports gehen, sondern nur über einen einzigen Analogport abgefragt werden: Die Tasten liefern über einen Widerstands-Spannungsteilerkette unterschiedliche Spannungswerte.

Die LCD-Anzeige kann über die Standard-Arduino-Bibliothek **LiquidCrystal** angesteuert werden.  
Initilaisierung

```
LiquidCrystal lcd(8,9,4,5,6,7);
```

Die Tasten werden so abgefragt:

```
//Sample using LiquidCrystal library
#include <LiquidCrystal.h>
```

```
