

Softwareliste

Die folgende Liste enthält alle mir im TAP-Format vorliegenden Programme. Eine spezielle MD5-Prüfsumme erleichtert das Auffinden von Doubletten.

Die meisten dieser Programme in der [Mega-Flash-Software](#) enthalten und liegen als TAP-Datei dem zugehörigen Download-Paket bei (s. [downloads](#)). Die TAP-Dateien können im JKCEMU direkt geladen werden. Um mit realer Hardware zu arbeiten, wird mit [KCSAVE](#) aus den TAP-Datei ein Audiosignal erzeugt oder alternativ eine WAV-Datei gespeichert.
